Project Pattern Issue #45

Lizard Stepping Stone

This mosaic glass lizard will fit in stepping stone molds of various sizes and shapes.

We like it in a 14" round stone.

In larger stones, you may want to add a border of your choosing.

Materials:
one square foot of
"lizard colored" glass

Don't worry if your glass pieces don't match the pattern shapes exactly. Accuracy isn't as critical in a mosaic project like this. Just cut small pieces that come close to the pattern and grind or groze them to approximate the shapes here.
