

Stained Glass News

project pattern #74

Sparkling Star

Materials

1 sq. ft. glass

A) 1/2 sq. ft. glass

B) <1/2 sq. ft. glass

C) scrap

1 large star (concave square) bevel
approximately 4" x 4"

4 small star (concave square) bevels
approximately 2 3/8" x 2 3/8" each

glass colors used in "Sparkling Star" project

A) Spectrum 100RR Clear Rough Rolled

B) Spectrum 121RR Lt. Green Rough Rolled

C) Spectrum 151RR Cherry Red Rough Rolled

1 Large Star Bevel (approx. 4" x 4")

4 Small Star Bevels (approx. 2.4" x 2.4")

If you are unable to find star bevels the size of those used in this pattern, you can use bevels that are slightly smaller or larger. Just center your bevel over the star in the pattern and trace around it, extending or shortening the adjoining lines to fit.

If you can't find small star bevels, you can take small square bevels (1" or 1 1/2") and use a grinder to shape them into stars. Then, as described above, adjust the pattern to fit.
