## Project Pattern Issue #39

### Abstract Lamp Shade

This lamp pattern will make a lampshade about 11" in diameter and 6" tall. Build three of each panel and assemble them into a six-sided shade, alternating each panel with the other as you go. If you need help building the lampshade, your supplier can recommend a book or video on the process and probably even offers classes or workshops to make one.

#### Materials:

- A,B,C,D 1/2 sq.ft. each
- E 2 sq.ft.
- F 1"x6" rectangle bevel  
(cut and grind to shape)
